About Pomplus

Pomplus Corp. Ltd. Diacrete WWCB Group - The first manufacturer of wood wool cement board in Taiwan with more than 50 years of experience in the manufacturing and developing the system of wood wool cement board.

Since 1964, Diacrete WWCB Group manufacturing facilities is accredited with ISO 9001 and ISO 14001 certifications and has obtained Green Building Label and Green Product Certification in both Taiwan and Singapore. Diacrete WWCB Group produces environmental friendly building material with natural wood fibers combined with inorganic cement minerals in the production process integrating innovative ideas in the concept of "Less is More". Choose a long lasting natural raw material where production is in Taiwan's excellent climate condition with bright sunlight and strong wind. A friendly ambience achieving a well balance between man-made architecture and natural environment. Factory production and headquarters is in Taiwan and Southeast Asia sales office is in Singapore.

Product Introduction

General View of Product Application

A series of eco green building materials originated in Taiwan that has notable acoustic solutions and aesthetic designs to many applications that is made up of the 2 main important ancient materials - wood log and cement.

The wood log is from replanted wood in the perennial plantation forest and is shredded into long wood wool fibers where cement is the only adhesive substance that binds with the long wood wool fibers forming high density strength of the board transforming into a sturdy, durable board that has many key advantages.

It creates a sense of warmth, calm and safe to use for interior ambience, even in outdoor coastal or complex climate environment .

65%
wood
wool

35%
cement

Product Features

Fire
resistance

Heat
insulation

Sound
absorption

Humidity
balance

Anti-
termite

Anti-
mold

Product Application

General View of Product Application

Diacrete wood wool cement board have been welcome by the building industry continuously for more than 50 years. The product have been widely used abroad on the exterior, interior and roof heat insulation of buildings, moreover the applications used for spaces designed for acoustic field are effective in resolving the problems of echoing and noise. Furthermore, it is also recognized by the building industry as an energy-saving building green material.
